# Durafleck 5000

*A New and Unique Flooring System*

## Durafleck 5000

The CTi Durafleck 5000 finish provides a beautiful, durable, granite-like finish that is perfect for many areas around the home. Garage Floors, Basements, workshops, even countertops spring to life with the Durafleck 5000 System.

The Durafleck 5000 System is a state-of-the-art concrete coating that offers a stain resistant, easy to clean surface. Tougher than concrete, the Durafleck System resists wear and tear and wipes clean with a damp sponge or mop. It is the perfect surface for all high traffic, heavy use areas.

- Residential
- Garages
- Workshops
- Basements

### Commercial

- Hospitals
- Convenience Stores
- Schools
- Auto Showrooms
- Grocery Stores
- Airports
- Convention Centers
- Restaurants

### Technical Information

(sealed with Pro Seal 200)

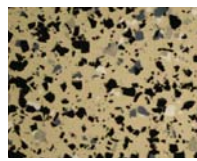

Tensile Strength	6500 psi
100% modulus	5200 psi
Elongation	200%
Sward Hardness	50
¼" Mandrel bend	Pass
Direct impact	>160
Reverse impact	>160
MEK 100 double rubs	No effect
Toluene, spot test	No effect
Gasoline, spot test	No effect
IN KOH, spot test	No effect
Glacetic acetic acid	No effect

### YOUR AUTHORIZED DEALER

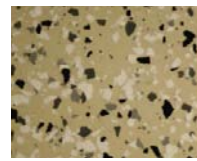

Colors are matched as closely as possible to our standards. Colors may be affected by age, light and texture.

The color selector is designed to assist you in making your selection for CTi's Reflective Flooring Additive colors. CTi's Reflective Flooring additive colors are measured by weight (not volume) and are designed to be added to 100% solids epoxy. 1-4 pigment packs should be added per gallon of epoxy base, depending on the look desired. Mix thoroughly for 3 minutes to insure proper dispersion. CTi's Reflective Flooring may be used in other clear vehicles such as polyurethane, acrylic sealers and waterborne epoxies all with different effects.

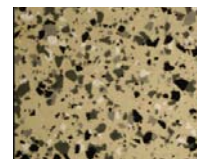

To ensure proper color, the entire contents of the CTi's Reflective Flooring Additive should be used. Be sure to thoroughly read all application data on whatever vehicle you are adding the CTi's Reflective Flooring Additive to. Due to reproduction limitations, it is necessary that we reserve the right to allow for reasonable variations of application. Printed colors show approximate color without effect of dispersing techniques, finishing techniques or application procedure. Variation of application will also affect the final appearance
